

C WIRE

RELEASED MARCH 2011

www.omatter.com

Oakley C WIRE® is true dimensional art, fleshed out with tech and style. The stems are crafted with smooth contours and ports, and titanium MONO SHOCK™ hinges allow them to hyper flex when the world comes at you head-on and dares to make contact.

We've toyed with a few elements in our day, and many of those metals have been melded into alloys. Our original C WIRE celebrated the success of C5™, a lightweight blend of five metal compounds with the kind of durability that keeps comfort at the top of the list. We jacketed the stems with UNOBTAINIUM® to increase grip with sweat. The Three-Point Fit eliminates pressure points, because life has enough of those already.

BENEFIT	FEATURE	TESTIMONIALS
---------	---------	--------------

- 1 This is a frame that looks good on just about anybody that puts it on.
- 2 Constructed of lightweight and durable titanium, the hinge acts as a spring which allows this frame to comfortably fit on a variety of different head shapes and sizes.
- 3 The subtle stem details of the C Wire have a very sculptural look and feel, and are unmistakably Oakley design.

- VERSATILE SHAPE**
- MONOSHOCK HINGE**
- UNIQUE STEM DESIGN**

"C Wire has excellent coverage, excellent peripheral coverage. It will work well for a wide variety of customers."
