

OVERLORD

RELEASED MAY 2011

www.omatter.com

Comfortably lightweight, the immortal metal known as titanium has been digitally sculpted into a look of sophistication. Oakley OVERLORD™ takes inspiration from the company's heritage of X-METAL® eyewear to salute design-minded pioneers of imagination; the guys who are out there creating stuff that matters. TWIN SHOCK™ hinges allow for hyper-flexing, and the comfortably secure fit utilizes adjustable nose pads and UNOBTAINIUM® earsocks.

It takes advantage of some of the most advanced eyewear hinges ever created. Inspired by the shock-absorbing leaf springs of race cars, Twin Shock hinges can be flexed beyond their normal open point, and there is no inward pressure that can cause discomfort during extended wear. The UNOBTAINIUM on the earstems is engineered to increase grip with perspiration. For the best optics, match OVERLORD with Oakley Authentic Prescription Lenses.
