

# OAKLEY ELITE PIT BOSS™

We strive to raise physics to the level of art, and our Elite collection raises that to the level of masterpiece. Signed with a specially designed metal icon, this exclusive collection of ultra premium eyewear blends the most technologically innovative milestones in optical science with rich materials and unrivaled architectures. Elite is for those who settle for nothing but the best.

PIT BOSS is a select member of the Oakley Elite collection. The frame features lightweight titanium plates chiseled with a precision of 0.002 inches, secured to stress-resistant O Matter® with specially engineered bolts for high velocity protection. PIT BOSS is equipped with Oakley HDPolarized lenses which filter out 99% of glare, and the back of each lens has the added protection and glare reduction of anti-reflective (AR) coating. The front of the lenses are augmented with Iridium® coating to further reduce glare while precisely balancing light transmission. On top of that, we added Oakley Hydrophobic™ anti-smudge lens coating to repel water and oils. The unrivaled design and innovation of the Elite status is confirmed by the faceted metal icons that adorn the titanium plates on each side of PIT BOSS.
