

SERVO

RELEASED FEBRUARY 2012

OAKLEY

www.omatter.com

Dual colors of durable acetate highlight a confident look of take-charge ideas, and four different frame sizes let you pick the perfect fit. Oakley SERVO™ adds even more comfort with spring hinges and heat adjustable temples. This power broker of style has squared lens orbitals and sleek earstems, and the look gives sophistication some brawn.

The right frame starts with the right style, and it doesn't stop there. You deserve a made-for-you fit. That's why Oakley SERVO is available in four different sizes and each one is heat adjustable. Spring hinges add to the comfortably secure fit, and the frame material makes it surprisingly lightweight. There's nothing lightweight about the styling because even with its smooth refinement, SERVO would rather own a look than play somebody else's game. This Oakley original comes with a collection-specific case.
