

# RACING JACKET

RELEASED APRIL 2012

www.omatter.com

Adapt and conquer with Oakley SWITCHLOCK™ Technology for fast and easy lens changing so you can optimize your vision for the environment. RACING JACKET® takes all the clarity, convenience and comfort of Oakley JAWBONE™ and cranks up style with icons you can change whenever the mood strikes you. And when G-forces strike you, the retaining strap makes sure the frame stays put. Two sets of lenses are included (one for bright light and one for low light), and you'll have HIGH DEFINITION OPTICS® (HDO®) to go along with the performance comfort and protection of ultra-premium sport eyewear.

This is eyewear that craves the chaos of action sports. You'll want to gear up by adding optional lens sets, and we engineered a full collection for RACING JACKET®. Take advantage of the glare-cutting performance of Oakley HDPolarized lenses. Choose lenses with IRIDIUM® coating for precisely balanced light transmission. Get Oakley Photochromic lenses that adapt to changing light by darkening automatically. You can even get Oakley Authentic Prescription Lenses with a wide range of options.

BENEFIT	FEATURE	TESTIMONIALS
---------	---------	--------------

**1** Fastest and easiest lens interchange system on the planet.

**SWITCHLOCK**

**2** Allows the wearer to easily customize the look of their frames to match their personality.

**INTERCHANGEABLE  
ICONS**

**3** Provides the ultimate security to the head, no matter what you are doing.

**REMOVABLE STRAP**

"What we did with Racing Jacket is we took the larger frame and we grew the top to give you more field of view, that way, you are not looking over the top of the frame [when you are cycling.]"
