

# BLENDER

RELEASED NOVEMBER 2011

**OAKLEY**

www.omatter.com

Our fresh concoction called BLENDER™ is the perfect mix for active lifestyles. Lightweight C-5™ alloy is combined with O MATTER® earstems and sure-grip UNOBTAINIUM® for unrivaled comfort and durability.

Our revolutionary C-5 alloy is a fusion of five metal compounds with a barely-there feel, so you'll experience the all-day comfort of low weight. Farther down the earstems, stress-resistant O Matter frame material takes over, and hydrophilic Unobtainium gives the fit a better grip when you perspire. You'll also have 8.75 base lens curvature to open up your peripheral view and improve side protection against sun, wind and impact. Blender takes advantage of Oakley's Three-Point Fit that keeps the optics in precise alignment while freeing you from the irritation of pressure points because the temples don't hook around your ears.

## BENEFIT

- 1** Smaller wire frame style perfect for customers with small to medium-sized faces.
- 2** A first for Oakley, the C5 alloy front is rigid and durable, while the O Matter stems provide flexibility and comfort.
- 3** Cushioned nosepiece provides all-day comfort, and keeps the frame light on the face.

## FEATURE

**SMALL TO MEDIUM  
FACE FIT**

**METAL FRONT WITH O  
MATTER STEMS**

**AIRBAG NOSEPIECE**

## TESTIMONIALS

"Oakley Blender is on the medium to small size. So the type of customer you would look to put this on would have a medium to small face."
