

# CHIEFTAIN

RELEASED FEBRUARY 2012

www.omatter.com

Only titanium could achieve a frame this lightweight and durable, and CHIEFTAIN™ commands comfort with style that rules all it surveys. Six base curvature shapes a contour across the eyes while UNOBTAINIUM® earsocks increase grip with perspiration to keep the frame in place. Choose between two available frame sizes and use the adjustable nose pads to customize the fit.

Titanium has a proud position on the periodic table of elements, and it's well earned. This is the metal of satellites and fighter jets, and it allowed us to take the idea of wire frames and give it the distinction of dimension. The orbital bridge and earstems put the flat 2-D look of ordinary metal frames to shame. Also take note of the lens orbitals and see how we made them subtly angular near the nose pads, slightly squared at the outer edge, and smoothly contoured all around. It's a clean look of confidence with original style that makes CHIEFTAIN a head honcho. This authentic Oakley design comes with a collection-specific case.
